

If you are an EDI vendor, ensure that the ship method you provide in the ASN (856) message exactly matches with the ship method specified in the order. For the list of codes used, check the "EDI SHIP_METHOD_CODE." Incorrect Ship method code will result in Ship Method Mismatch issue, leading to chargebacks and possibly account suspension.

Below are the Amazon defined ship method codes by carrier, the name used by the carrier, and additional information regarding the associated restrictions for each ship method. This list is subject to change.

EDI SHIP_METHOD_CODE	NAME USED BY CARRIER	ADDRESS RESTRICTIONS
